

Deliver Secure Products On Time and On Budget

The RunSafe Security Platform automates vulnerability identification and mitigation so that you can reduce the costs of compliance and security while releasing resilient products to the market.

THE CHALLENGES PRODUCT LEADERS FACE

Product leaders are up against several challenges:

- Ensuring the **profitability of products**
- **Meeting compliance requirements** without draining resources
- **Incorporating security without compromising speed to market**
- Balancing stakeholder, customer, and market demands

RunSafe Security directly addresses these challenges with an end-to-end embedded security platform built to increase software resilience and save you time and money.

THE RUNSAFE SOLUTION

RunSafe Security addresses the needs of product teams through automated solutions for vulnerability identification, code protection, and monitoring throughout the software lifecycle.

\$2.08M

Saved per year

Average savings customers realized based on automated risk reduction

By eliminating an entire class of vulnerability and simplifying compliance, RunSafe increases your profitability by streamlining workflows, saving developer time, and reducing the risk of a breach.

BENEFITS

- Free up developer resources and reduce the costs of compliance
- Reduce the time you spend on vulnerability mitigation by 50%
- Neutralize an entire category of vulnerability to lower your risk
- Deliver secure releases on time and on budget

STREAMLINE YOUR SECURITY EFFORTS

Start delivering secure products, faster. Reduce the need for last-minute fixes and patches and free up developer resources with automated vulnerability identification and mitigation.

AUTOMATE COMPLIANCE

Don't let compliance costs or requirements hold back innovation. Generate accurate SBOMs in minutes and defend your software at runtime to stay in compliance with industry standards.

PROTECT YOUR BRAND AND REPUTATION

Eliminate an entire class of vulnerability in your software to reduce the likelihood of a successful breach. RunSafe deploys runtime protections that enable embedded software to defend itself.

REDUCE SECURITY TOOL SPRAWL

Keep your development, security, and operations teams aligned. RunSafe integrates with your CI/CD pipeline to unify SBOM generation, vulnerability identification, and automated mitigation.

ABOUT RUNSAFE SECURITY, INC.

RunSafe Security proactively protects embedded software for both commercial and defense deployments across critical infrastructure, with comprehensive risk identification, protection, and monitoring, ensuring robust, continuous security without affecting performance. Headquartered in McLean, Virginia, with an office in Huntsville, Alabama, RunSafe Security's customers span the aerospace, defense, energy, industrial, and national security verticals.
